It is known that monopole antenna apparatus can be mounted on a trailer for traveling along a highway. The monopole antenna apparatus is commonly manufactured to have a height of approximately 10 feet and a width of approximately 10 feet, which is far too tall and wide for use in a vehicle such as a truck. Since it is difficult and time consuming to erect such a monopole antenna prior to traveling along a highway, there is a need for a method and apparatus for a1d647c40b
