This article provides information about the software, its history, pricing, and online apps. AutoCAD and the AutoCAD Graphics language AutoCAD is a 2D and 3D drafting, designing, and drafting software application that is developed by Autodesk. In order to take full advantage of AutoCAD software, a skilled professional engineer or architect must master AutoCAD's unique scripting language, AutoCAD Graphics. The AutoCAD Graphics scripting language was developed and is maintained by Autodesk. This scripting language is especially useful for AutoCAD users that are already skilled in the visual arts (design, drawing, painting, etc.), as well as those professionals that have existing drawing skills. AutoCAD has two types of programming, scripting and coding. These two programming concepts are related. A code script is a preprogrammed list of commands that a user can use to create something on the computer screen, much like a prewritten piece of music or a poem. For example, a user can write a code script to find the center of a circle and then write a code script to scale that circle to a half-size circle. A user can then use the script to generate the second circle. AutoCAD

This allows you to configure a drawing to have layouts that can accommodate a variety of object sizes (auto-size), shape ratios (scale to fit), and scale alignment (fit to each other). Keep your AutoCAD settings across system restarts: In AutoCAD, when you restart the computer, AutoCAD keeps your document settings when the system is started. Your drawings keep their settings. Organize your drawings with add-on collections: Create collections of documents for content-specific file management. Quickly add links to many different external file types, such as: AutoCAD and DWG documents (linked to DWG or DWF files) Excel spreadsheets and PPT presentations Images Word files Flash movies PDFs MIDI Wave files Animate drawings Replace existing drawings: Merge two drawings or replace the target drawing by an existing document. A template is created automatically and the target drawing is updated.
